

Titel	Transnational Mobility in Initial Vocational Education and Training in 2017 – Survey of vocational schools			
DOI	10.7803/384.17.1.2.10			
Short description	In 2017, the National Agency at the Federal Institute for Vocational Education and Training conducted a mobility study on apprentices' stays abroad. The survey was conducted among the head teachers of vocational schools. In addition to the head teachers of vocational schools the study also surveyed apprentices in their final year of training, firms providing training and graduating classes from vocational schools. Some of the graduating classes surveyed can be linked to the information provided by the school head teachers via a school ID.			
Survey year	2017			
Survey unit	Vocational schools			
Thematic topic	Stays abroad during vocational training			
Data access	Remote Access (for full-text, special or regional variables)			
Number of variables	GWA: 249	VT: 30	SV:	REG:
Population	Vocational schools in Germany			
Weighting/extrapolation	No			
Representative region	None			
Number of cases	132			
Survey mode	Online survey			
Selection procedure	Proportionally stratified random selection			
Survey design	Cross-sectional design
